

U.S. DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
NATIONAL WEATHER SERVICE
NATIONAL CENTERS FOR ENVIRONMENTAL PREDICTION
5200 AUTH ROAD
CAMP SPRINGS, MD 20746-4304

Technical Note

**DESCRIPTION OF THE SST DATA ASSIMILATION SYSTEM
USED IN THE
NOAA COASTAL OCEAN FORECAST SYSTEM (COFS)
FOR THE U.S. EAST COAST
Version 3.2***

John G.W. Kelley[†][#]
UCAR Visiting Postdoctoral Scientist
Environmental Modeling Center
Ocean Modeling Branch

David W. Behringer
Environmental Modeling Center
Climate Modeling Branch

and

H. Jean Thiebaut
Environmental Modeling Center
Ocean Modeling Branch

December 1999

THIS IS AN UNREVIEWED MANUSCRIPT, PRIMARILY INTENDED FOR INFORMAL
EXCHANGE OF INFORMATION AMONG NCEP AND NOS STAFF MEMBERS, AND
COLLABORATORS

* OMB Contribution No. 174

[#] Present Affiliation: NOAA/National Ocean Service, Coast Survey Development Lab, Silver Spring, MD

Table of Contents

1. Introduction	1
2. Coastal Ocean Circulation Model.....	2
a) Grid Configuration	4
b) Lateral Boundary Conditions	6
c) Surface Boundary Conditions	8
d) Tidal Forcing	10
e) Parameterizations	12
f) Numerical Methods	12
g) Daily Execution Procedure	13
3. Types of SST Data	14
a) In-Situ SST Observations	14
1) Drifting Buoys	14
2) NDBC and AES Fixed Buoys	16
3) NDBC Coastal-Marine Automated Station Network	17
4) Voluntary Observing Ships	17
5) METAR Stations	18
6) NOS Water Level Stations	18
7) USCG Stations	19
b) MCSST Retrievals	19
4. Creation of Unified Surface Marine In-Situ Observation File for COFS Region	20
5. Creation of MCSST Retrieval File for COFS Region	24
6. Preparation of SST Data for the Data Assimilation System	25
7. SST Data Assimilation System	28
a) Derber/Behringer Assimilation Scheme	28
1) Objective Analysis Function	30
2) Observational Error Covariance Matrix	31
3) First-Guess Error Covariance Matrix	32
4) Procedure to Minimize the Functional	33
5) Application of Scheme to COFS	35
b) Mixed-Layer Assimilation Procedure	40
c) Nudging Procedure.....	42
8. Potential Improvements	43
Acknowledgements	44
References	45
